## Author reply to Optics Express manuscript ID #409532

Dear Editor,

first, we would like to thank the reviewers for their time to review the manuscript, and for their kind assessment of the work. We also are grateful for the suggestion to characterize a few thick APDs in future work with this method, as suggested by referee 2 - we certainly will look into this with the APDs we can get a hand on.

With the revised manuscript, we fixed the typo pointed out by referee 1, and some issues in the references, as pointed out from the pre-production review.

Apart from an updated manuscript package, we uploaded a PDF version with the differences compared to the original manuscript under the redline category for easy reference.

Thanks a lot, and Best Regards on behalf of all authors,

Christian Kurtsiefer
