Dear Editor,

thank you for considering our manuscript in Optics Express, and thanks to the reviewers for their detailed comments.

We addressed the detailed comments from the reviewers in a separate response file in depth, and modified the manuscript at a few occasions accordingly. We also believe to have addressed the editorial office requests. For convenience, we added a difference file to easier find the updates in the manuscript.

We therefore hope to have addressed the points raised in the process, and would kindly ask to consider our revised manuscript for publication in Optics Express.

Looking forward for your reply!

With Best Regards on behalf of all authors,

Christian Kurtsiefer
