

Simple template for authors submitting to *Optics Express*

M. Scott Dineen and Jennifer Mayfield

*Optics Express Office, Publications Department, Optical Society of America,
Washington, D.C., 20036*

opex@osa.org

Abstract: A simple template with some examples is provided for preparing *Optics Express* manuscripts in L^AT_EX. For complete instructions, see `OpEx_style.tex`. Note that the style file `opex3.sty` replaces `opex2.sty`. Additional information on style and submissions is available at <http://www.opticsexpress.org/submission>.

1. Introduction

Standard L^AT_EX or AMST_EX environments should be used to place tables, figures, and math. Examples are given below.

```
\begin{figure}[htbp]
%\centering\includegraphics[width=7cm]{opexfig1}
\caption{Sample caption (Ref. \cite{Oron03}, Fig. 2).}
\end{figure}
```

```
\begin{equation}
H = \frac{1}{2m}(p_x^2 + p_y^2) + \frac{1}{2} M(\Omega)^2
(x^2 + y^2) + \omega(x p_y - y p_x).
\end{equation}
```

2. Conclusion

After proofreading the manuscript, tar and gzip the `.tex` file and figures; then enter the requested information into the *Optics Express* online submission system at <http://www.opticsexpress.org> and upload the tarred and gzipped archive. If there is video or other multimedia, the associated files should be uploaded separately.
